

Nerve Net (Radiates)

- (1) Simplest pattern
- (2) Extensive network
- (3) Impulse spreads
- (4) No differentiated sensory/motor/connector
- (5) Reflex arcs

Bilateral Nervous System (Flatworms)

- (1) Two anterior ganglia
- (2) Two main nerve trunks
- (3) Lateral branches
- (4) Peripheral & Central Nervous System

Molluscan Nervous System

- (1) Three pairs of ganglia
- (2) Complex in cephalopods
- (3) Highly developed sense organs

Cephalopod Nervous System

- (1) Textured nervous centers
- (2) Over 160 million cells
- (3) Highly developed sense organs
- (4) Complex behavior

Bilateral Nervous System (Annelids)

- (1) Bilobed brain
- (2) Double nerve cord
- (3) Segmental ganglia
- (4) Distinct afferent (sensory) and efferent (motor) neurons

Arthropod Nervous System

- (1) Resembles annelids
- (2) Larger ganglia
- (3) Better developed sense organs
- (4) Elaborate social behavior (hymenoptera)
